- Removing Barriers
- Affordable Access
- Equity
- Whole Person

Disruption of Primary Care & Prevention

- Prevention/Early Detection
- Removing Barriers
- Affordable Access
- Equity
- Whole Person

Disruption of Mental Health

based on social situation

- Removing Barriers
- Affordable Access
- Equity
- Whole Person

of Healthcare Purchaser Coalitions Driving Health, Equity and Value

On the Horizon

Other Public Health Emergencies

- There is no there, it is what it is COVID and other pandemics/endemics
- How are you going to protect your people and keep the operation running?
- Appropriate utilization of expensive and high intensity care (response to high intensity needs)
- Strategies have to be resilient enough to deal with the constant change
- Can't continue in the constant churn, need a plan on each of the 5 tenets
 - Encourage people to lean into treatment of chronic conditions
 - Remove barriers
 - Make sure people stay engaged and don't become anxious and depressed
 - End of the day, dealing with a lot of issues but also have to have a strategy that's appropriate for each person in 2023 and beyond
